

Healthy Louisiana Medicaid Plans

Your Healthy Louisiana plan will make sure you are able to see the right doctor when you need to. All plans provide the same essential health benefits and offer services such as chronic disease management for those with asthma, diabetes, and other chronic conditions. Plans may also offer extra benefits like gift cards for people who take their children to the doctor for routine wellness visits, preventive care screenings, and immunizations.

Choosing a Health Plan

If you **ALREADY** have a doctor:

Make a list of the doctors, clinics, hospitals, and other medical providers you use the most. Next, decide which medical providers are important to you and which ones you want to continue using. Finally, find out which health plan your preferred medical providers accept by: searching the internet for your providers, contacting your preferred doctors and medical providers directly, or calling Healthy Louisiana.

If you **DON'T** have a doctor yet:

Compare plans to see which ones offer services and programs you want. All plans offer the same basic benefits and health management programs, but some also offer extra programs and services. Examples include:

- rewards for healthy living and preventive visits
- unlimited primary care physician (PCP) visits for adult members
- programs to help you quit smoking
- limited dental benefits for adult members
- free over the counter medications
